

# Bag Adaptor CP

## TECHNICAL DATASHEET

- The Chemfort™ Bag Adaptor CP firmly connects to a standard IV bag or semi-rigid container to one of the Chemfort™ closed administration sets.
- A safe drug transfer from the syringe into the IV bag or semi-rigid container is installed through a closed connection with the Chemfort™ Syringe Adaptor (SA) / Syringe Adaptor Lock (SAL).
- A "click" sound indicates a safe, closed connection between two Chemfort™ components.
- The self-sealing elastomers prevent drug leakage and droplet formation on the outer septa surfaces.
- A simple pinch on the SA/SAL wings will safely disconnect the SA/SAL from the Bag Adaptor CP.
- PVC-free.

### Indications for Use:

The Chemfort™ Closed Administration components are a single use, sterile Closed System Transfer Device (CSTD) that mechanically prohibits the release of drugs, including antineoplastic and hazardous drugs, in vapor, aerosol or liquid form during administration, thus minimizing exposure of individuals, healthcare personnel, and the environment to hazardous drugs. Chemfort™ Closed Administration prevents the introduction of microbial and airborne contaminants into the drug or fluid path for up to 7 days.

### TECHNICAL DATASHEET

#### Order information

Article number / Reference	MG245252
User box quantity	50 pcs
Transport box quantity	100 pcs

#### Product Characteristics

##### Product technical data

Length	11 cm
Flow path volume	0.9 ml
Spike type	Non-vented one way spike
Distal end	Chemfort port
Septum piercings	Up to ten times
Shelf life	3 years
Sterilization	Ethylene Oxide

Tolerates disinfection with alcohol 70% and chlorhexidine in alcohol (5 mg/70% alcohol)

#### Material Specifications

Free of PVC, DEHP and Latex. Non-Pyrogenic. Free from lead, cadmium, arsenic and chrome. Meets standards and regulations with regards to the environment

##### Component

##### Material

Protective cap on spike	Polyethylene
One way Spike	Polypropylene
Elastomeric sealing	Polyisoprene

#### Regulation

##### CE 0483

Disposal of components should be according to local regulations and procedures for handling of hazardous drugs

Symbols taken from ISO 15223-1:2016

Consult instructions for use

Sterilized using ethylene oxide

Non-pyrogenic

Do not re-sterilize

Do not re-use

Do not use if package is damaged

Keep dry

Keep away from sunlight

Not made with natural rubber latex or DEHP
