

TEVADAPTOR® Closed Drug Reconstitution and Transfer System

Luer Lock Adaptor

Fits any
standard
female
luer lock
connection

TECHNICAL DATASHEET

Intended use:

Tevadaptor® is a Closed System Drug Transfer Device (CSTD) that mechanically prohibits the release of the drug in vapor, aerosol or liquid form during preparation and administration, and prevents the introduction of microbial and airborne contaminants into the drug or fluid path, allowing the system to minimize exposure of individuals, healthcare personnel, and the environment to hazardous drugs.

Luer Lock Adaptor:

The Tevadaptor® Luer Lock Adaptor converts any standard female luer lock port (e.g. patient access port) to a safe and closed Tevadaptor® connection. When connected to the Tevadaptor® Syringe Adaptor, a safe IV bolus or IV infusion drug administration from the syringe to the patient can be installed. In case of subcutaneous (SC) or intramuscular (IM) administration, there is a possibility to connect this component to the SC or IM needle. The Luer Lock Adaptor can also be used for the preparation of double luer lock bags, elastomeric pumps and medication cassette reservoirs for an ambulatory infusion pump. Its intuitive design makes it easy to use: with minimal effort both components can be connected and a simple push on the wings of the Syringe Adaptor will disconnect them again. During manipulation the “click” sound indicates a safe and secure connection. The self-sealing elastomers prevent drug leakage and droplet formation on the outer septa surfaces.

TDPT-IL-00083

TECHNICAL DATASHEET LUER LOCK ADAPTOR

Order information

Article number / Reference	1MG245550
User box quantity	100 pcs
Transport box quantity	400 pcs

Product Characteristics

Tolerates disinfection with alcohol 70% and chlorhexidine in alcohol (5 mg/70% alcohol)

Product Technical data

External fitting	Luer lock connection
Fluid path volume	0,12 mL
Septum piercings	Up to ten times
Shelf life	3 years
Sterilization	Ethylene oxide

Material Specifications

Free of PVC, DEHP and Latex. Non-pyrogenic. Free from lead, cadmium, arsenic and chrome. Meets standards and regulations with regards to the environment.

Component	Material
Housing	ABS
Rotor	ABS
Elastomeric sealing	Polyisoprene

Regulation

CE 0483
FDA 510(k) Cleared under ONB product code

Consult instruction for use

PVC-Free

Non-pyrogenic

Do not resterilize

Single use only, do not re-use

Not made with DEHP

Not made with natural rubber latex

Do not use if package is damaged

Keep dry

Keep away from sunlight

TEVA Medical Ltd.
